OBJECTIVE

Automation Developer looking to leverage 4+ years of development experience in building automation solutions and web application development with PHP and JavaScript. Passionate about programming and computer science.

EXPERIENCE

KPMG in India

Application Developer, Pune, August 2019 - Present

- Created 5+ BOTs of medium and large complexity using Ui Path RPA tool single-handedly from design and development to deployment.
- Contributed in creating more than 10 reusable activities to be used across the team.
- Created web applications using the WAMP stack for multiple clients.
- Worked with Databases like Oracle SQL, MySQL & MS SQL for CRUD operations in the above solutions
- Expertise in writing maintainable, documented and object-oriented code.

IBM India

Automation Developer, Pune, July 2016 – August 2019

- Created automation solutions using RPA technologies: Blue Prism and Ui Path to automate several use cases identified by the client.
- Deployed the solutions in Client Environment and executed all the go live activities.
- Worked extensively with UiPath Orchestrator and Blue Prism control room to handle multiple BOTs.
- Was involved in the design, development and deployment of all the above automation solutions
